Urban Furniture

didheya

**Stainless steel urban
furniture**

Outdoor spaces are the setting where community life is expressed most strongly: places to socialize, organize, share, and observe. It is within them that everyday stories intersect and the social fabric that defines our cities is built. Urban furniture plays an essential role in this transformation. It is not only about equipping streets, squares, or parks, but about creating attractive, integrated urban landscapes that invite interaction and enjoyment. Solutions that combine aesthetics, functionality, and durability, designed so that every public space becomes a place where society can grow, connect, and move toward a more human and connected future.

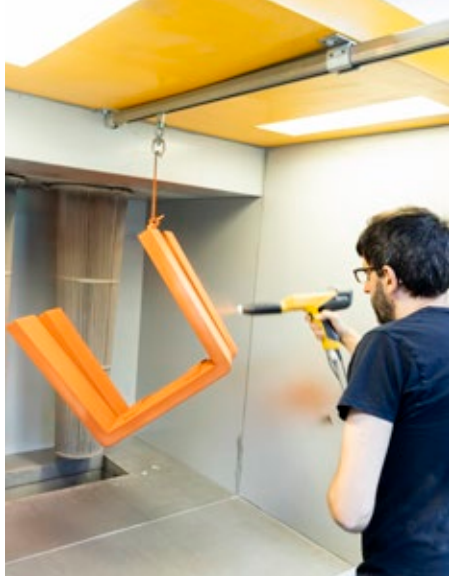

Kanpoko espazioak komunitate-bizitza gehien adierazten den tokiak dira: sozializatzeko, antolatzeko, partekatzeko eta behatzeko lekuak. Bertan gurutzatzen dira eguneroko istorioak gure hirien nortasuna osatzen duen jendarte-sarea eraikiz. Eraldaketa honetan, hiri-altzariak funtsezko eginkizuna badu. Helburua ez da soilik kaleak, plazak edo parkeak hornitzea, baizik eta elkarbizitza eta gozamena sustatzen dituzten paisaia urbano erakargarri eta bateratuak sortzea. Estetika, funtzionaltasuna eta iraunkortasuna uztartzen dituzten produktu hauek espazio publiko bakoitza jendartea hazteko, elkartzeko eta etorkizun gizatiar eta konektatuago toki bat bilakatzeko pentsatuak dira.

● Founded in the Basque Country in 1994, Didheya was born from a strong Basque metallurgical tradition. We are a design and manufacturing company specialized in high-quality stainless steel products for urban furniture, architectural hardware and accessories, and the transport industry.

● 1994an Euskal Herrian sortua, Didheya euskal tradizio metalurgiko sendo baten oinordekoa da. Altzairu herdoilgaitzezko kalitate handiko produktuen diseinu eta fabrikazioan berezitua den enpresa da, honako arloetan : Hiri-altzariak, arkitektura-burdineria eta garraio industrian.

THE HOE FACTORY OF PATRICIO ECHEVERRIA,
1924, GIPUZKOA

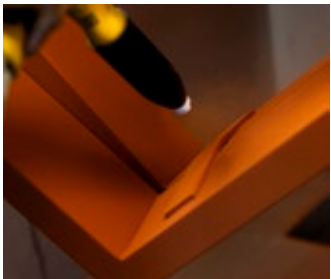

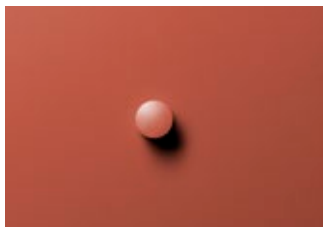

PATRICIO ECHEVERRIAREN ERREMINTA FORJATUEN LANTEGIA,
1924, GIPUZKOAN.

We are guided by a passion for design and high-quality products. With this purpose in mind — from our base in the city of Irun, by the Atlantic Ocean — we develop durable solutions with a distinctive character. Easy-to-maintain, environmentally respectful products that respond to the emerging needs of modern life.

Diseinuarekiko eta kalitate handiko produktuekiko pasioak gidatzen gaitu. Ozeano Atlantikoaren ondoan kokatua den gure Irungo egoitzatik, produktu iraunkorrak, mantentze errazekoak eta ingurumenarekiko errespetuzkoak garatzen ditugu, gure garaiko bizitzaren behar berriei erantzuteko xedearekin.

● **Custom Colors:** As manufacturers, producing electrostatic finishes not only allows us to launch new color ranges, but also to adapt to our clients' needs and preferences. Didheya's custom color service enables the creation of unique pieces for specific projects.

● **Neurrira egindako koloreak:** Fabrikatzaile gisa, estaldura elektrostatikoen ekoizpenak kolore-gama berrien sortzea ahalbidetzen digu, hortaz gain bezeroen behar eta gustuetara egokitzea ere. Didheyaren kolore pertsonalizatu zerbitzuak proiektu zehatzetarako pieza bakarrak sortzeko ahala ematen digu.

Iratzoki Studio x Didheya

“This collaboration between Didheya and Studio Iratzoki is particularly meaningful. For us, design is not limited to the creation of objects; above all, it is about close collaboration with the company, centered around its values and its vision for the future. Didheya, with whom we had already collaborated years ago on a stainless steel bathroom collection, has evolved continuously since then. The company has successfully faced various economic crises and adapted to changing markets. It began in hardware and interior architecture, later expanding internationally in the public transport sector — metro, trains, and buses. In doing so, it has developed genuine expertise in stainless steel, from cutting and bending to machining, welding, and coloring.

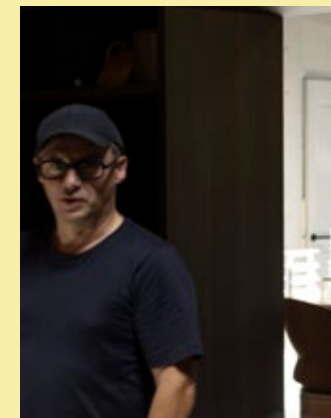

Our work has revolved around this material, projecting it into outdoor furniture for both public and private spaces. We have sought to create long-lasting, highly resistant products that are easy to maintain and environmentally responsible. Some collections combine stainless steel with other materials such as solid wood, concrete, or stone, produced by companies close to Didheya in the Basque Country. We have also worked around different activities within public spaces, paying attention not only to form, but also to function and user experience.”

Jean Louis Iratzoki

“Didheya eta Iratzoki Studioko elkarlana interes handikoa da. Guretzat, diseinua ez da objektuen sortzean mugatzen : enpresarekin, bere balioekin eta epe luzerako ikuspegiarekin lotutako lan estua da. Didheyarekin elkar lan bat eraman genuen, garbi geletako inox bilduma baten inguruan, duela urte batzu. Urteetan zehar inpresa etengabe garatu da, krisi ekonomiko desberdinak gaindituz eta merkatuaren aldaketetara egokituz. Hasieran burdinerian eta barne-arkitekturan, ondoren nazioartean garatu zen garraio publikoaren sektorean (metroa, trenak eta autobusak). Altzairu herdoilgaitzaren inguruko ezagutza sakona eskuratu du, ebaketatik hasiz, tolestura, mekanizazioa, soldadura eta koloreztatzeraino.

Naturalki, ekai huni buruz egituratu da gure lana. Kanpo-altzarietan proiektatutako lanak garatu ditugu, espazio publiko zein pribatuetarako. Produktu iraunkorrak, oso erresistenteak, mantentze errazekoak eta ingurumenarekiko errespetuzkoak sortzea izan dugu helburu. Bilduma batzuek altzairu herdoilgaitza tokiko materialekin konbinatzen dira. Hala nola zur trinkoa, hormigoia edo harria, Didheyatik hurbil Euskal herriko enpresa batzuetatik ekarriak. Espazio publikoan hainbat erabilera eta praktikak jorratu ditugu, forma zainduz segurki, baita ere erabiltzaileen funtzioa eta esperientzia kondutan hartuz”

Jean Louis Iratzoki

●● Hanka

● The Hanka bench collection embodies Didheya's expertise. These stainless steel seats are crafted from cut and bent tubes, resulting in clean-lined pieces with robust proportions. Elegant and versatile, they integrate naturally into both public and private spaces, indoors and outdoors. The variety of colors and finishes expands their possibilities, allowing for sober or more expressive configurations.

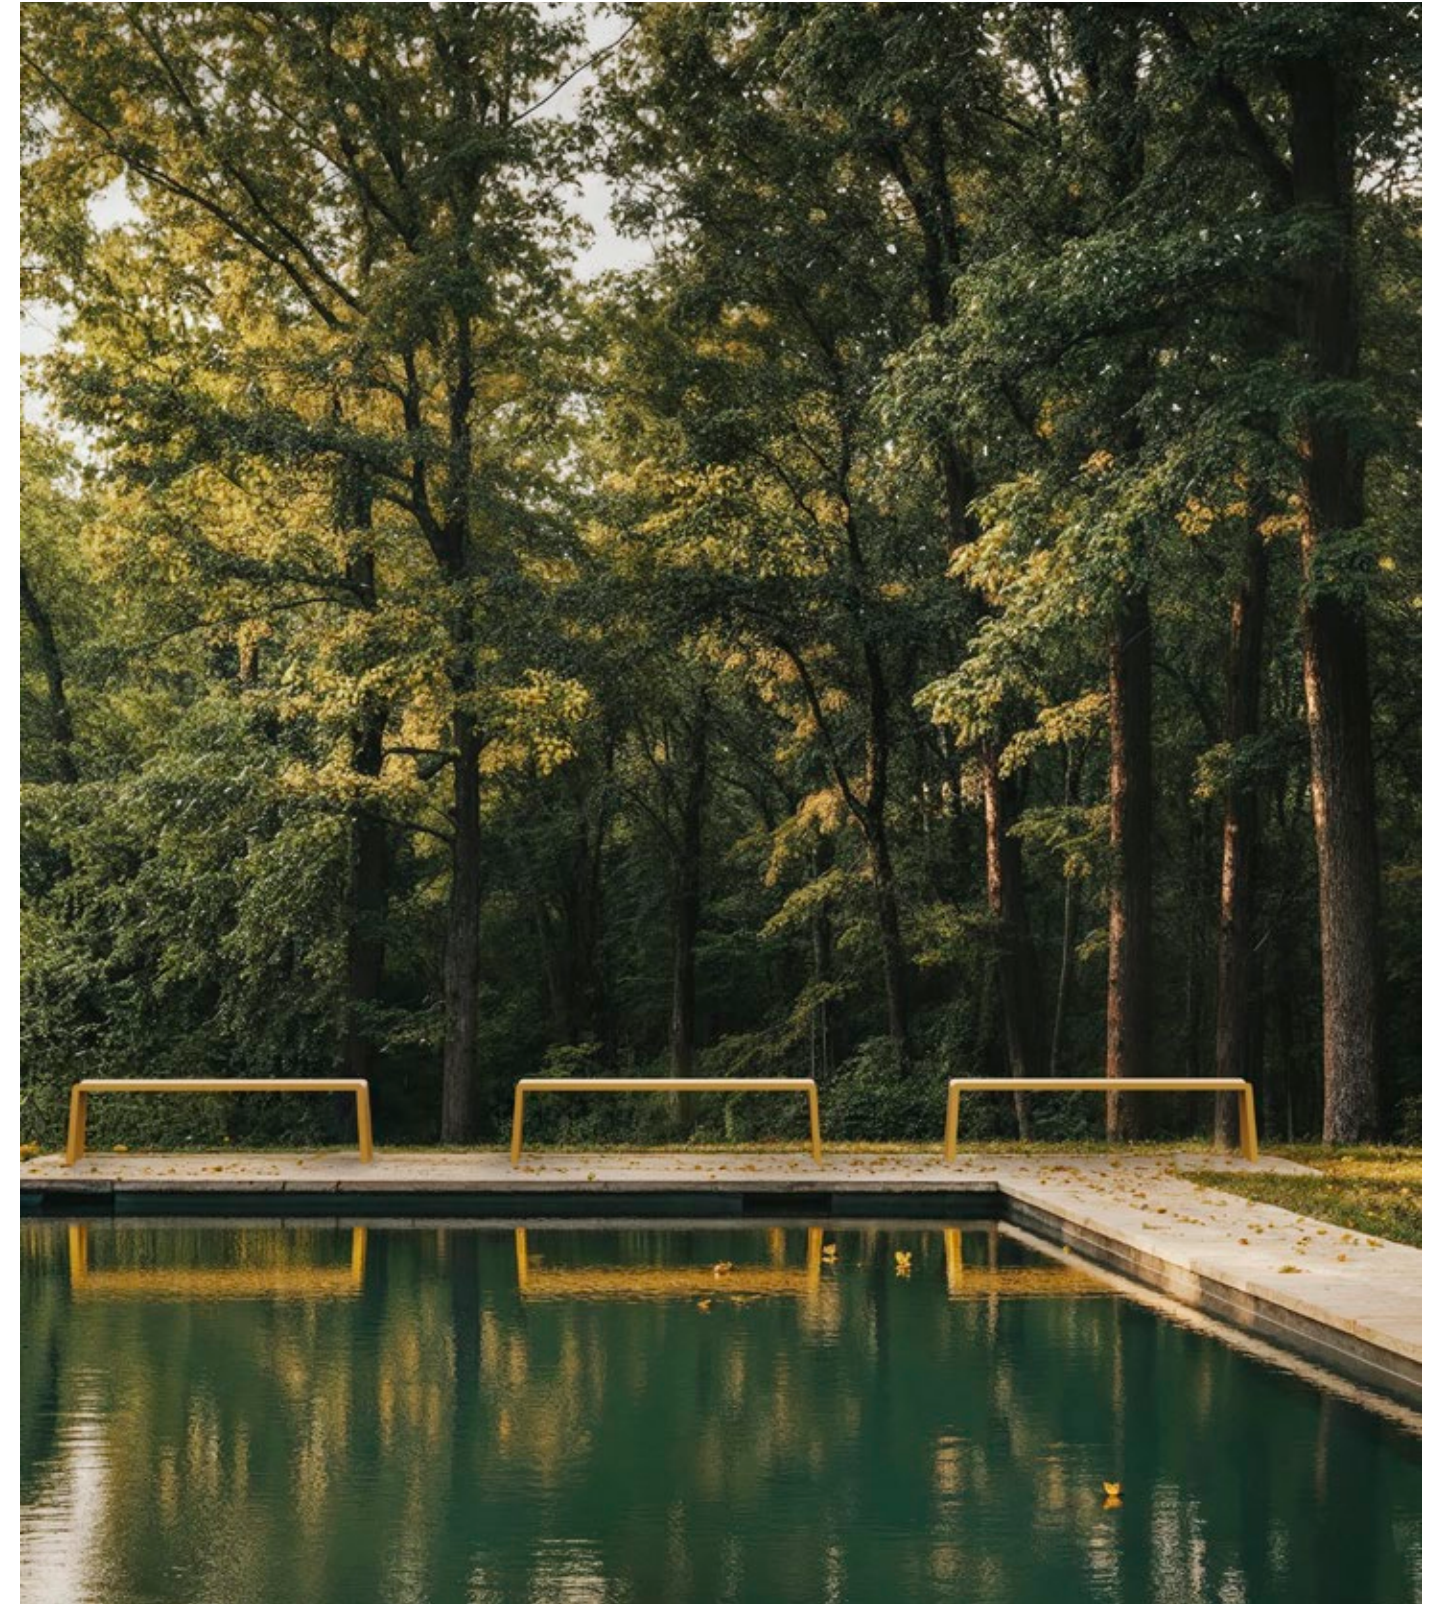

● Hanka bildumak, Didheyaren jakintza teknikoa gauzatzen du. Altzairu herdoilgaitz hodietatik abiatuta, ebaki, plegatu eta soldatuak direnak. Eleganteak eta praktikoak, espazio publiko ala pribatuetan kokatzen dira, kanpoan barnean bezain ongi. Kolore desberdintasunak bilduma hau aberasten du, diskretua izanez edo espresio handikoa berdina.

●● Hodi

● The Hodi collection is a modular system offering multiple possibilities for public spaces. Straight or curved configurations, open or continuous combinations: its different components allow the seating to adapt to the urban environment. It includes benches with or without backrests, with the option to insert small tables between modules to expand their uses — sitting, resting, conversing, eating, or working.

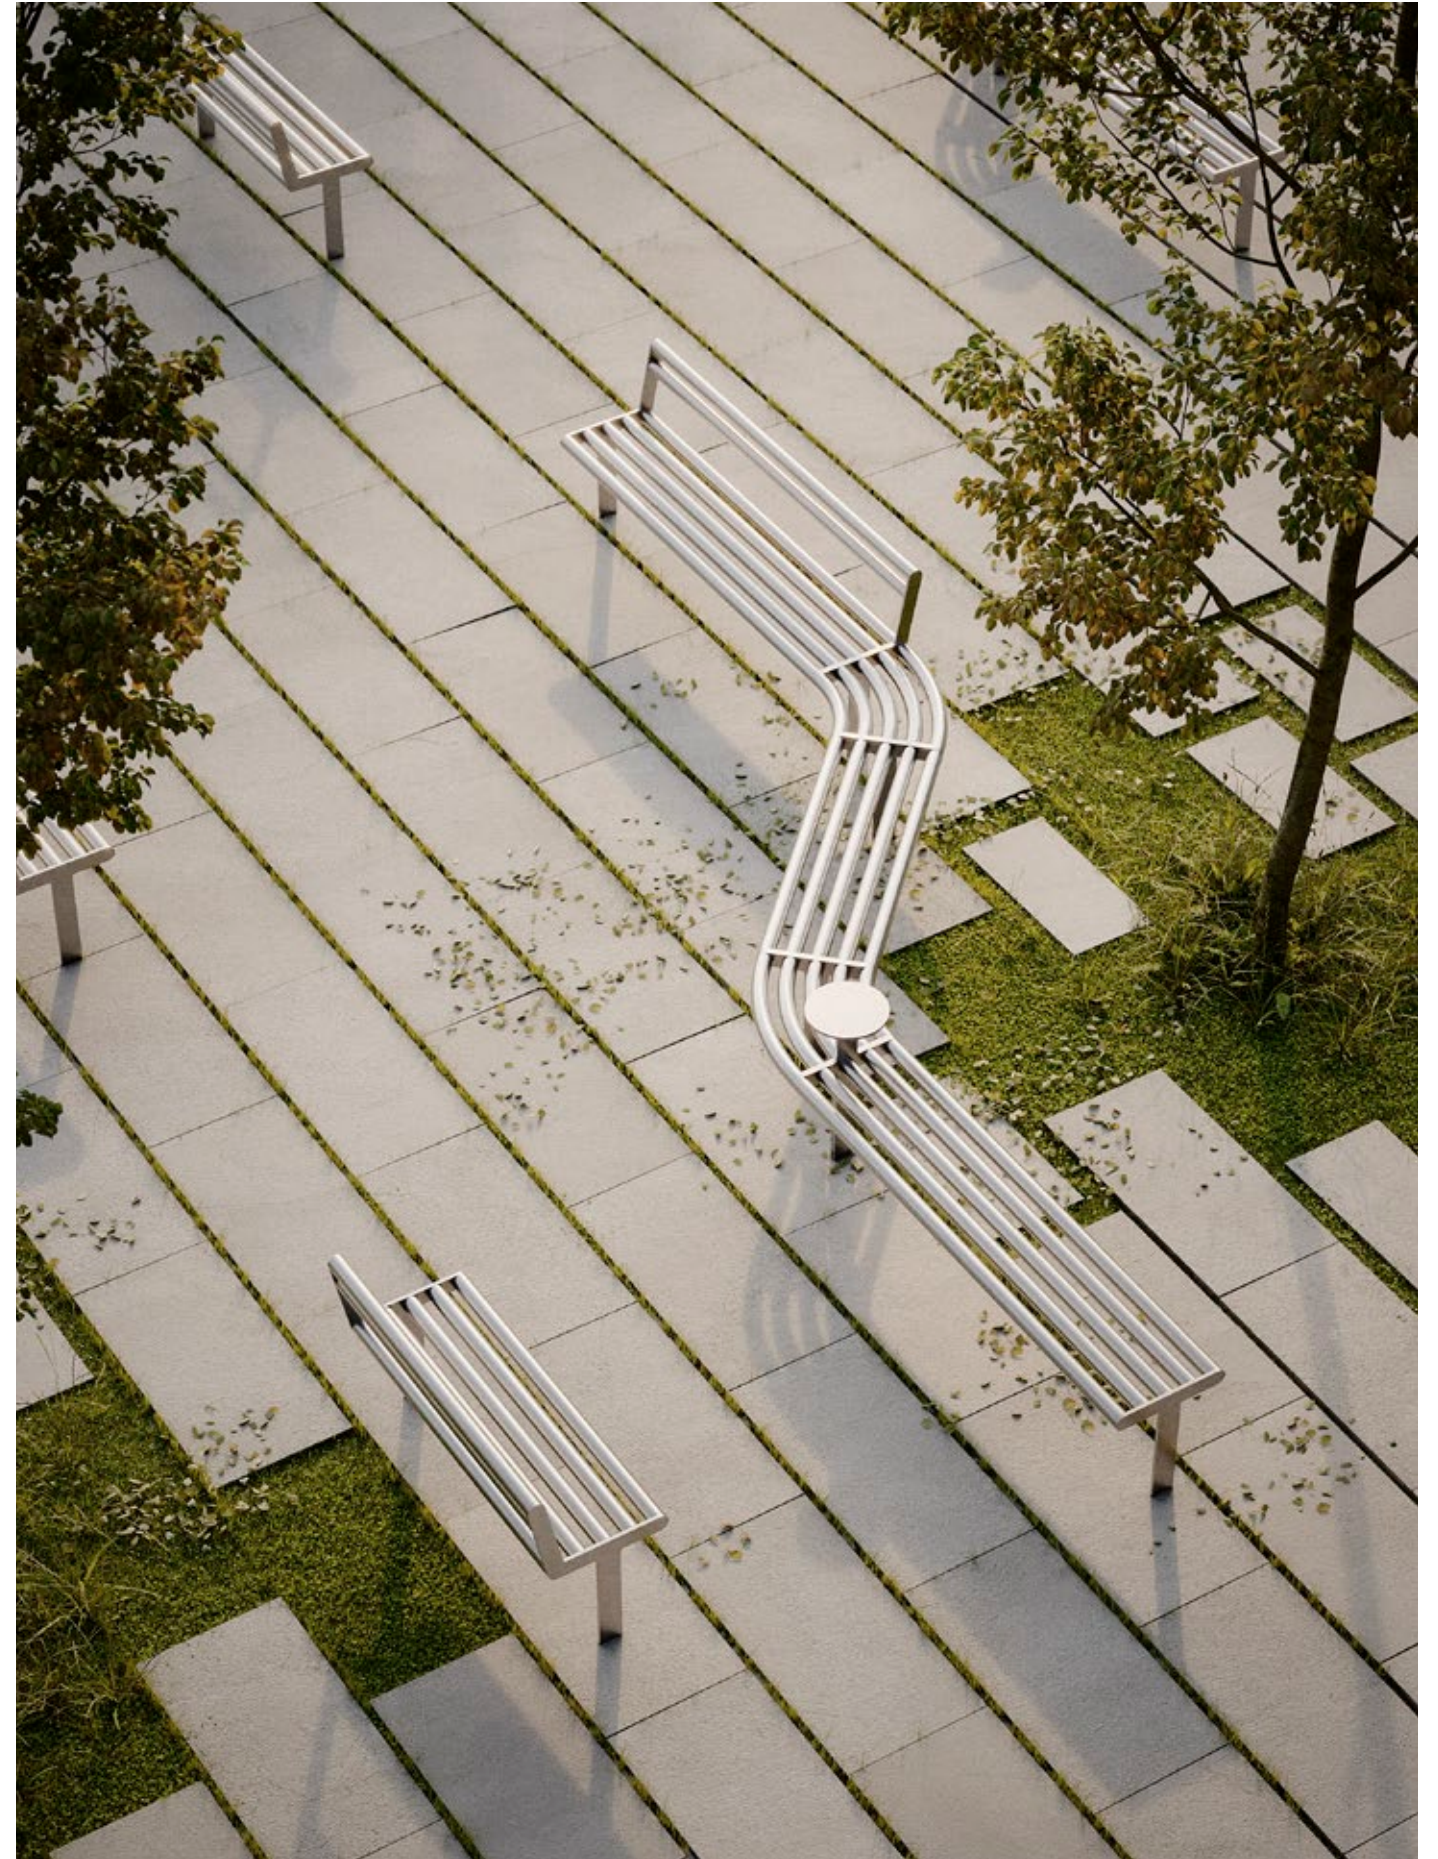

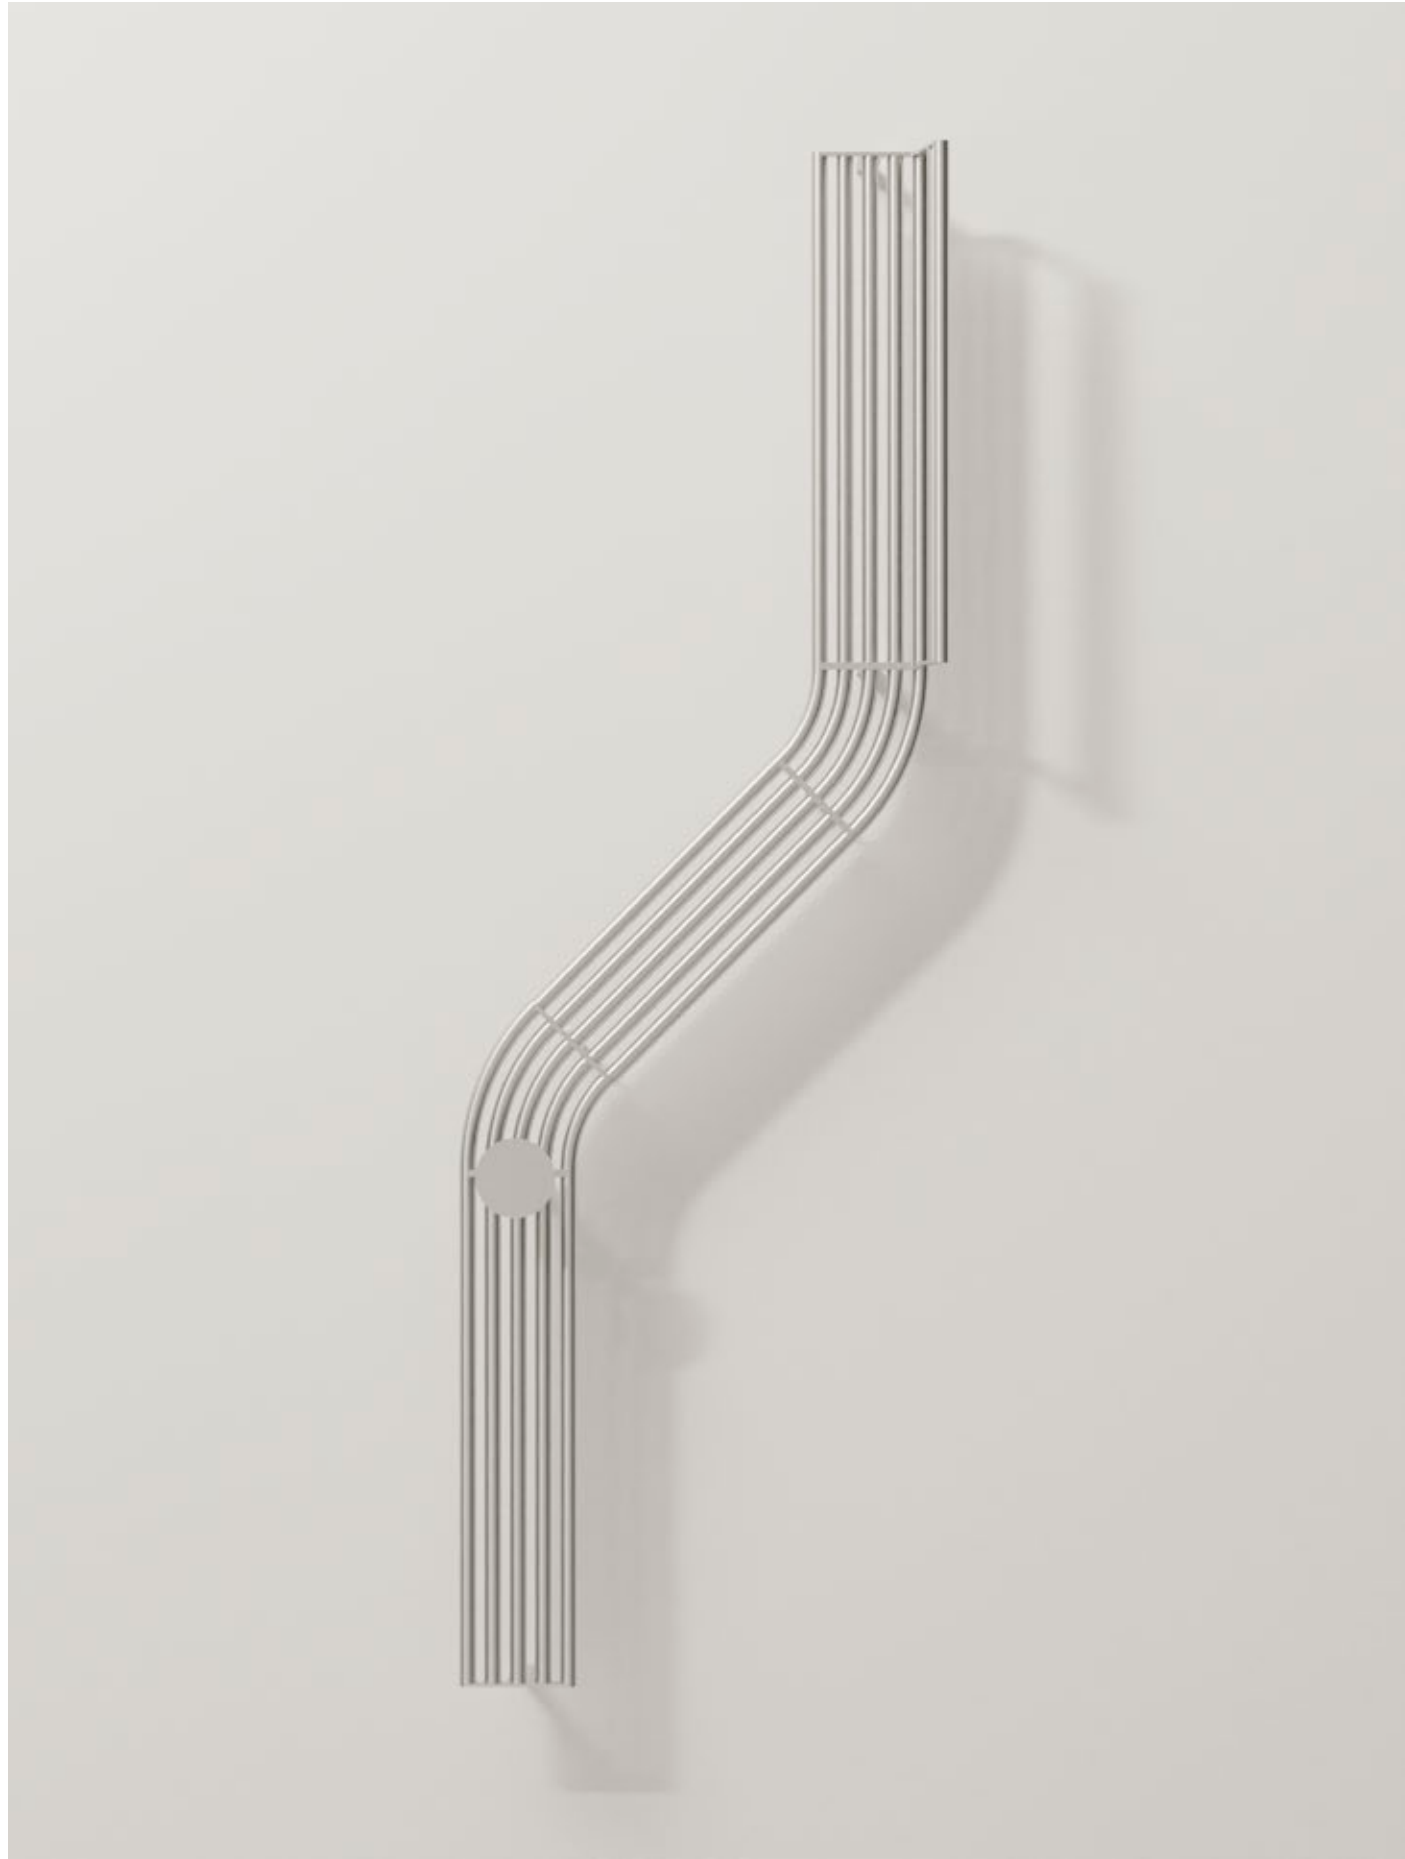

● Hodi bilduma, sistema modularra espazio publikoetarako. Lerro zuzenak edo bihurriak, angeluak edo kurbak : jarlekuak hiriko ingurumenean egokitzeko elementu ugari. Bilduma hunek bizkaraldearekin edo bizkarrik gabeko linealak sortzea ahalbidetzen du. Jartzeko, atsedean hartzeko, elkarrizketarako, jateko edo lanean aritzeko mahai ttikiz osatua.

●● Aroa

● The Aroa collection brings genuine comfort to public spaces. From individual armchairs to collective benches, including bicycle racks, its stainless steel pieces are designed to equip both outdoor and indoor environments. Defined by graphic purity and visual lightness, Aroa facilitates the creation of spaces for rest and interaction.

● Aroa bildumak erosotasun handia ematen dio espazio publikoari. Besaulki indibiduala, banku kolektiboa, bizikleta lotzeko euskarria. Altzairu herdoilgaitzezko pieza hauek kanpoko eta barneko espazio publikoak antolatzeke eginak dira. Alde grafikoa eta arintasun bisuala ezaugarri dituen Aroa bildumak lasaitasun eta bizikidetzarako eremuak sortzen ditu.

●● Luze

● The Luze collection allows for a wide range of solutions: from complex configurations that structure urban space to benches conceived as singular pieces. A collection designed for sitting, leaning, or reclining, encouraging meeting and interaction. Available in stainless steel and concrete, with the option to manufacture seats in local stone, highlighting local resources and identity.

● Luze banku bilduma, elementu guttirekin, konfigurazio askotarako pentsatutako sistema da. Eseri, atzera jarri, buruz-buruz ezarri edo barraren kontra xutik egon. Bi ekai nagusiren osaketa da : altzairu herdoilgaitza eta hormigoia. Altzairu herdoilgaitza bertako harri batekin konbina daiteke, inguruetako material hori ekoiztu eta balorizatuz.

ALTZAIRU HERDOILGAITZARI BURUZKO MITO ETA ERREALITATEA

Myths & Facts

ABOUT STAINLESS STEEL

The thermal behavior of stainless steel outdoors is very different from what you might imagine. Stainless steel acts as an efficient thermal conductor, not a heat accumulator, which means its thermal performance is balanced. Stainless steel is hygienic, durable, recyclable, and, unlike other materials, requires very little maintenance.

#1

Is stainless steel suitable for outdoor use in terms of thermal performance?

Yes. Stainless steel is an excellent thermal conductor, not a heat accumulator. This means it quickly adapts to ambient temperature without retaining excessive heat, preventing surfaces from becoming uncomfortably hot or cold. Its balanced thermal performance makes it ideal for outdoor use.

#2

Does it withstand time and weather conditions well?

Absolutely. Stainless steel is highly resistant to corrosion, even in coastal or humid environments. It does not rust or degrade easily, ensuring great durability with minimal maintenance.

#3

Does stainless steel furniture require much maintenance?

No. Occasional cleaning with water and mild soap is enough to maintain its original appearance. Its smooth surface prevents dirt buildup, making it a practical, low-maintenance option.

#4

Is it sustainable?

Yes. Stainless steel is 100% recyclable without any loss of quality. At the end of its lifespan, it can be fully reused, making it an environmentally responsible choice.

#5

Is it hygienic and safe for outdoor use?

Of course. Its non-porous surface prevents the growth of bacteria, mold, and fungi. In addition, it does not emit toxic compounds or degrade under sun or rain exposure, making it hygienic and safe for any outdoor environment.

#6

How does sunlight affect stainless steel?

No le afecta negativamente. El acero inoxidable no se decolora, no se agrieta ni pierde propiedades con la exposición al sol, lo que lo convierte en una opción excelente para zonas expuestas al sol todo el año.

#7

Does stainless steel get too hot in the sun?

Less than it may seem. As an efficient thermal conductor, steel heats up, but it also dissipates heat quickly. This prevents prolonged heat accumulation that could become uncomfortable.

#8

Can stainless steel be used near the sea or in salty environments?

Yes, especially in its marine-grade version (AISI 316). This specific alloy offers superior resistance to corrosion caused by salt, making it ideal for coastal areas or swimming pools.

#9

How does it compare to other materials in terms of durability?

It performs far better. Unlike wood or aluminum, stainless steel does not warp, rust, or deteriorate over time, making it a long-lasting investment.

#10

Is it suitable for high-use areas such as hospitality or public spaces?

Absolutely. Its structural strength, ease of cleaning, and durability make it ideal for demanding environments with heavy traffic and continuous use.

#11

Can it be combined with other materials such as wood, fabric, or stone?

Perfectly. Its neutral and elegant aesthetic allows it to be combined with almost any other material, adding contrast and modernity without visually competing.

#12

Does stainless steel negatively impact the environment during its lifecycle?

No. It does not emit toxic substances or cause pollution. Moreover, its durability prevents frequent replacements, reducing long-term resource consumption.

#13

How does the passage of time affect the finish of stainless steel?

Very little. With minimal care, it maintains its original appearance for decades. Even if superficial stains appear, they can easily be restored through specific cleaning or polishing.

#14

Is it a costly option compared to other materials?

The initial investment may be higher, but it is more than compensated for. Its durability, low maintenance, and long lifespan make it a more cost-effective solution in the medium and long term.

#1

Egokia al da kanpoaldeetarako portaera termikoagatik?

Bai. Termiko hedatzaile ona da, ez metatzailea. Inguruko tenperaturara azkar egokitzen da, beroa gehiegi atxiki gabe, azal beroegi ala hotzegiak saihestuz. Bere termiko portaera orekatua ideala da kanpoko lekuetan.

#2

Denboraren eta klimaren aurrean erresistentea al da?

Bai. Korrosioarekiko oso erresistentea da, baita kostaldeko inguruneetan ere. Ez da herdoiltzen, ez da errexki hondatzen : Iraunkortasun handi bat entretenimendu guttirekin.

#3

Mantentze handia behar al du?

Ez. Ur eta xaboi neutroarekin noizean behin garbitzea nahikoa da. Bere azal lehunak zinkikeri akumulazioa tratatzen du.

#4

Jasangarria al da?

Bai. %100 birziklagarria da kalitatea galdu gabe. Bukaeran berritz erabil daiteke.

#5

Higienikoa al da?

Bai. Azal ez-porotsua du, bakterioen eta lizunen ugaritzea eragozten duena. Gainera, ez du aosagai toxikorik, iduzkiak edo euriak ez dio kalterik eragiten, seguru eta garbia egoiten da.

#6

Eguzkiak kalte egiten al dio?

Ez. Ez da deskoloratzen, ez arrailtzen. Ez ditu bere ezaugarriak galtzen iduzkitan edo euripean.

#7

Gehiegi berotzen al da?

Dirudiena baino gitxiago. Beroa azkar xahutzen du, hedatzaile termiko ona baita.

#8

Itsas inguruneetan erabil daiteke?

Bai, batez ere AISI 316 bertsioan, gatzarekiko erresistenteagoa.

#9

Beste materialekin alderatuta?

Iraunkorragoa da; ez da deformatzen edo herdoiltzen. Denborarekin ez baita hondatzen, inbertsio iraunkorra dela erakustera ematen digu.

#10

Erabilera intentsiborako egokia al da?

Bai, ostalaritza eta espazio publikoetarako aproposa, iraupen eta garbitze errestasunari esker.

#11

Beste materialekin konbina daiteke?

Bai: Zura, ehuna, harriarekin konbina daiteke, modernitatea eta kontrastea erakutsiz modu orekatu batez.

#12

Ingurumenari kalte egiten al dio?

Ez. Ez du substantzia toxikorik igortzen ez du kutxatzen. Kontsumoa ttikiarazten du bere iraupen handiari esker.

#13

Denborak akaberari nola eragiten dio?

Oso gutxi. Hamarkadetan mantentzen du bere itxura. Azaleko orbanak errexki desagertzen dira garbitzean edo lehuntzean.

#14

Garestia al da?

Hasierako inbertsioa handiagoa izan daiteke, baina epe ertain eta luzera konpentsatzen da.
